

Closure

The [COVID-19 Regional Risk Matrix](#) is one tool that can inform the decision-making process for school districts when considering when remote learning might be indicated. Local circumstances should be considered when making decisions impacting specific school districts and schools. Many factors would need to be considered when deciding to close schools such as the distribution of cases within the school. **Closure is a local decision that should be made by school administrators in consultation with local public health. While it is not possible to account for every scenario that schools may encounter over the course of the school year, the following scenarios may help inform the decision for when schools should temporarily close.**

SCENARIO	CLOSURE
1 confirmed case in the school	School remains open*; students and staff in close contact with positive case are excluded from school for 14 days.
2 or more cases in the same classroom (outbreak limited to one cohort)	School remains open*; students and staff in close contact with positive case are excluded from school for 14 days. Recommendations for whether the entire classroom would be considered exposed will be based on public health investigation.
2 or more cases within 14 days, but are linked to a clear alternative exposure that is unrelated to the school setting and unlikely to be a source of exposure for the larger school community (e.g. in same household, exposed at the same event outside of school)	School remains open*; students and staff in close contact with positive cases are excluded from school for 14 days.
2 or more cases within 14 days, linked together by some activity in school, but who are in different classrooms (outbreak involving multiple cohorts)	Recommendations for whether school closure is indicated will be based on investigation by local health department.
A significant community outbreak is occurring or has recently occurred (e.g., large event or large local employer) and is impacting multiple staff, students, and families served by the school community	Consider closing school for 14 days, based on investigation by local health department.
2 or more cases are identified within 14 days that occur across multiple classrooms and a clear connection between cases or to a suspected or confirmed case of COVID-19 cannot be easily identified (outbreak involving multiple cohorts)	Close school for 14 days.
Very high risk of community transmission (refer to COVID-19 Regional Risk Level Matrix)	Close school until COVID-19 transmission decreases.

* Note: A temporary closure may also be considered for a period of 2-5 days if a student or staff member attended school while potentially infectious, before being confirmed as having COVID-19. This short-term dismissal allows time for local health officials to gain a better understanding of the COVID-19 situation impacting the school and perform contact tracing.

Period of closure: After switching to remote learning due to high levels of viral transmission in the school or local geographic community, districts or schools should wait a minimum of 14 days before
